

LOMANDRA LITTLELIME

Meet Lime Tufts little brother; LittleLime! This variety has the same brilliant lime green colour that Lime Tuff is known and recognised for, and the same strength and durability, but is a smaller more rounded tuft. This unique, cylindrical shape is perfect for landscapes and streetscapes that require lower plants, and also helps to create depth in gardens.

LittleLime is a highly versatile plant, and is ideal for low borders and government roadside applications where plants that obstruct visibility are less favourable. LittleLime has finer foliage than Lime Tuff, and flowers that grow close to the base making them not easy to detect. Because of this, LittleLime has little to no maintenance requirements and can stay lush all year round.

HIGHLIGHTS:

- Smaller, more compact version of Lime Tuff
- Vibrant lime green foliage
- Proven to withstand short periods of frost
- Moderately drought tolerant
- Suitable for coastal areas
- Can handle clay & heavy soils

Species	<i>Lomandra confertifolia</i>
Common name	Strappy leaf grass
Produced from	Tissue Culture
Tray size	Plugs available from Greenhills
Label code	005002-143
Height/Width	50cm / 50cm
Habit	Upright, compact habit
Growing pH	pH 6.0 - 6.5
Finishing Times	In 140mm, 8-10 weeks
Pests & Diseases	No major pests or diseases
Position	Full sun/part shade
