

ALOHA MANDEVILLA

SPECIES: *Mandevilla hybrid* **COMMON NAME:** Mandevilla

The Aloha Mandevilla are bred along Dipladenia lines, meaning they are much more shrub-like and will climb when they find something to climb onto.

These varieties are hardy, quick growing, heat loving plants that are well-branched and well-behaved, making them easy to manage and keep in shape. Flowering consistently from spring to autumn, and all year in warm tropical climates, the bold flower colours contrast against the glossy green foliage, and create a spectacular display.

Part of the Aloha series is the incredible Aloha Forever Red: the only Australian bred Mandevilla on the market that will not fade in the heat of summer, giving you brilliantly red flowers that last all season!

CARE:

Remove old flower stems and leaves as close as possible to their base. Sprinkle a small handful of a good quality slow release general purpose fertiliser around the base of the plant in Autumn and Spring. Water only when the top of the potting mix has dried out.

USES/GROWERS TIPS

- Position in full sun
- Requires Free draining soil
- Trim lightly to promote new growth & flowering.

PEST & DISEASES

- Aphids
- Two spotted mite
- Mealy Bug
