

# BIG SERIES Pelargonium

**SPECIES:** *Pelargonium calliope* **COMMON NAME:** Pelargonium

The Pelargonium BIG series, bred by Syngenta, needs no introduction as it has already taken Australian gardeners by storm.

The BIG Series of Pelargoniums will bring big impact to your garden. Boasting bright, bountiful colour these varieties are sure to please the eye. Large, doubled blooms present themselves atop mid-green, compact foliage, setting a neat, yet exciting scene.

Flowering from spring to autumn, the BIG series looks amazing in hanging baskets, large pots and planted in garden beds. Being heat and drought tolerant, these plants perform well in most regions of Australia.

## CARE:

Plant in well drained soil. Adequate watering is required until established. Apply a slow release fertiliser in Spring. Remove spent flowers to encourage new blooms. Prune to maintain shape in late Autumn.
