

Clarity Blue™

Dianella hybrid 'DP401' (l)

STRAPPY LEAF PLANTS

Combines the beauty of Utopia® Dianella with the toughness of Cassa Blue® Dianella.

- The Clarity Blue™ Dianella is a cross between Cassa Blue® Dianella caerulea and Utopia® Dianella prunina.
- It is much tougher and better performing than Utopia® Dianella with a clear blue colour.
- Forms a nice clump like Cassa Blue® Dianella and has showy flower stems like Utopia® Dianella.
- It keeps cleaner foliage and handles periodic wet feet better than Utopia® Dianella.
- Best planted in free draining soils like all blue foliage Dianella plants, or in raised gardens with heavier soil types. Avoid prolonged wet feet.

Description	Blue foliage clumping Dianella
Density	4–8 plants per m ² 2–4 per linear metre
Height & Width	550mm x 450mm
Flowering	September–November
Best Planting Time	March–November
Uses	Colour contrast, accent plant, group plantings
Position	Full sun to part shade Tolerates frost & drought
